

REDACTED VERSION

MARY FALLIN GOVERNOR

#### OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY

October 21, 2014

The Oklahoma Department of Environmental Quality (DEQ) sampled water from your house well on September 18<sup>th</sup>, 2014 as part of a reoccurring sampling event that will be performed approximately every three months. DEQ has offered this sampling to residents that live on, or adjacent to the Wilcox Oil Company Superfund Site. You are receiving this letter because you have provided DEQ permission to enter your property and collect a water sample from your well.

DEQ sampled for three types of contaminants that can be found on historical refinery locations. Those are: Volatile Organic Compounds (VOCs), Semi-Volatile Organic Compounds (SVOCs) and Metals.

The first page of the sampling data is for VOCs. Results of the sampling are located in the Results column. The "<" symbol indicates that the substance was not detected in the sample. The next three pages are for SVOCs, and the last page for Metals. The "<" symbol in the Qualifier column indicates that the substance was not detected. No VOC or SVOC chemicals were detected in the water sample from your well. Several metals were detected at normal levels and are not considered to be a health risk.

The purpose of this sampling event was not to fully define the extent or type of contamination that may be present on the Wilcox Site. All potential health risks from the Site are <u>unknown</u> at this time. Further soil, sediment, surface water and ground water testing will be required in the future to determine how best to clean up the Wilcox Site.

If you have questions about this letter or the sampling data, do not hesitate to call me at (405) 702-5136. Please contact Bart Canellas with the U.S. Environmental Protection Agency at (214) 665-6662 with any questions about the EPA Superfund process or plans for the Wilcox Site.

Sincerely,

Todd Downham

Project Manager, Wilcox Oil Company Superfund Site Land Protection Division

Oklahoma Department of Environmental Quality

SAMPLE RECEIVING COMMENTS:

ICE; SAMPLE TEMP = 4.1C

ANALYST'S COMMENTS:

Heather Rhoads (8270DM), (ND) None detected. (UJ) The compound was analyzed for but was not detected at a level greater than or equal to the reporting limit for this sample analysis; however, the absence of detection may be inaccurate (due to certain quality control measures not meeting criteria).
